REPORT TASK-1

For Task 1, I created a digital literacy awareness infographic using Canva. The purpose of this task was to spread awareness among students about the importance of digital literacy in today's world. My design included key topics such as safe internet practices, professional online presence, and useful digital tools for students.

I used simple visuals, icons, and short text to make the infographic easy to understand and visually appealing. The goal was to ensure that even someone with basic knowledge could quickly grasp the concept of digital literacy.

While working on this task, I found it interesting to explore different design elements and layouts. However, selecting the right content and arranging it in a limited space was slightly challenging. I had to make sure that the information was clear without overcrowding the design.

Overall, this task helped me understand how to present information in a concise and visually engaging way. It also improved my creativity and awareness of digital literacy concepts.

REPORT TASK-2

For Task 2, I built my student digital portfolio by creating and updating profiles on platforms such as GitHub, LinkedIn, and CodeChef. These platforms are widely used for showcasing skills, networking, and improving technical knowledge.

On GitHub, I created a profile README that includes my basic details such as name, branch, and my learning goals. On LinkedIn, I updated my education details to reflect my current academic status. These steps helped me start building a professional online presence.

This task helped me understand the importance of maintaining a digital identity. These platforms will be useful for applying for internships, connecting with professionals, and tracking my progress over the next four years.

Initially, I was not very familiar with all these platforms, but exploring them made me more confident in using them. I plan to regularly update my profiles, add projects, and actively participate in coding platforms to improve my skills.

Overall, this task was very useful in helping me take the first step toward building my professional digital presence.

REPORT TASK-3

For Task 3, I explored coding and collaboration platforms. I used CodeChef as my coding practice platform, where I completed a beginner-level problem. This helped me understand how coding platforms work and improved my basic problem-solving skills.

In addition, I created a Google Form titled 'Digital Literacy Awareness Quiz' consisting of five questions, including multiple choice and short answer types. I also analyzed the responses using Google Sheets, which helped me understand how data is collected and managed.

I found the coding challenge slightly challenging at first, but it helped me improve my logical thinking and programming skills. Creating the Google Form was also interesting, as it showed how easily surveys can be conducted and responses can be collected.

These platforms will be very helpful in my academic journey. Coding platforms will help me practice and improve my skills, while tools like Google Forms and Sheets will help in data collection and collaboration in projects.

Overall, this task enhanced both my technical and practical skills.

REPORT TASK- 4

For Task 4, I learned about professional email writing and online communication etiquette. I wrote two formal emails, one requesting an assignment extension and another expressing

interest in a summer internship opportunity. While writing these emails, I focused on maintaining a clear subject line, polite tone, proper structure, and professional sign-off.

In addition, I created a social media do's and don'ts checklist to promote responsible online behavior among students. This helped me understand the importance of maintaining a positive digital presence.

A situation where poor digital communication can cause problems is when a student sends an unprofessional or unclear email to a professor. This may create a negative impression and affect communication. Such issues can be avoided by using proper formatting, polite language, and clear intent.

Overall, this task helped me understand how important communication skills are in both academic and professional environments.

REPORT TASK- 5

For Task 5, I explored the topic of cybercrime, specifically UPI fraud. While researching this topic, I learned how easily people can be tricked into sharing sensitive information or approving fraudulent transactions.

What surprised me the most was how common these scams are and how simple techniques are used to deceive people. Many victims are unaware of these methods, which makes them more vulnerable.

As a result of this task, I will be more cautious while using online payment systems. I will avoid clicking on unknown links, verify payment requests carefully, and never share sensitive information like UPI PIN or OTP.

This task helped me understand the importance of cybersecurity awareness and encouraged me to adopt safer online practices in my daily life.
